Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to cpds. of formula I and their pharmaceutical compositions.

Group II, claim(s) 1-3, 9 and 10, drawn to cpds. of formula II and their pharmaceutical compositions.

Group III, claim(s) 1-3,9 and 10, drawn to cpds. of formula III and their pharmaceutical compositions.

Group IV, claim(s) 11, drawn to a method of screening using cpds. I.

Group V, claim(s) 11, drawn to a method of screening using cpds. II.

Group VI, claim 11, drawn to a method of screening using cpds. III.

Gp. VII, claims 11-17 drawn to method of treatment using cpds. I

Gp. VIII, claims 11-17 drawn to a method of treatment using cpds. II

Gp. IX, claims 11-17 drawn to a method of treatment using cpds. III.

Gp. X, claims 18-20 drawn to a method for affecting PI 3-K mediated signaling using cpds. I

Gp. XI, drawn to a method of affecting PI 3-K mediated signaling using cpds. II

Gp. XII drawn to a method of affecting PI 3-K mediated signaling using cpds. III

The compounds I and II are old. See Hoehn US Patent 3,935,222, cited by applicants, which shows compounds of formula II as anti-inflammatories.  
Also see Quiroga et al, Tetrahedron, cpds. 12 and 4a -4k. cited by applicants.

Thus the presumption of a single inventive concept is destroyed and restriction is proper.

Election of a single species of whatever is elected is required in case no generic claim is found to be allowable.

If a method of treating disease is elected besides a single compound election of a single disease is required.
